WHY DRINK SCHOOL MILK?

Milk provides nutrition for learning and energy for a long day at school – the perfect finishing touch for a healthy packed lunch . As a parent, you can help your child maintain healthy eating and drinking habits.

Milk is the most important source of calcium in the diet and helps strengthen your child's bones.

Milk is rich in protein – the body's most important building block.

Milk contains a range of vitamins and minerals that are important for your child.

Milk is one of the foods with the widest variety of different nutrients in the same product.
